Globotriose-APE-HSA (pK antigen)

Gal α 1-4Gal β 1-4Glc β 1-APE-HSA

The oligosaccharide is linked to HSA lysine residues via a spacer using the isothiocyanate coupling method. The spacer used is *p*-aminophenylethyl (APE). The spacer is glycosidically linked to the reducing monosaccharide unit of the oligosaccharide.

The conjugates normally contain 10-20 moles oligosaccharide per mole HSA.

The conjugate is supplied as a freeze dried powder.

Storage: -18° C.
